

Fold-A-Way Patio Door

NEW FROM LINCOLN

MELD INDOOR AND OUTDOOR SPACES WITH EASE

	Specifications
Maximum Panel Width	35-13/16"
Maximum Panel Height	105-1/4"
Maximum Number of Panels	8 each direction (47.75' opening)
Maximum Panel Weight	176 lbs. each
Door Panel Thickness	1-3/4"

NOTE: When using maximum door width and height, door may exceed maximum door weight. Calculated weight check should be done.

Panel Configurations

Numerous out-swing configurations are available anywhere from two to eight panels in each direction and can include an access panel. The innovative hinge system enables all door panels to be made the same size regardless of the door configuration. Below are a few of the configurations that are available.

***NOTE: Configurations without access panels are not accessible from the exterior.**

Wish you could blend the lines between the inside and outside of your home or have the ability to easily turn two rooms into one - and back again? Your wish has come true with the introduction of Lincoln's new Fold-A-Way Patio Door.

When closed, this new door system provides a secure barrier from unwanted visitors, noise and weather elements while maintaining the view. When open, it creates an expansive passage between indoor and outdoor spaces without fixed glass panels, mullions or posts.

If you are looking for a breathtaking feature to add to your next project, consider Lincoln's new Fold-A-Way Patio Door.

Track, Guide Channel and Sill

The Fold-A-Way Patio Door is a top mounted track system allowing the weight of door to be carried on the header. The bottom guide glides with minimal effort in a polypropylene floor channel lining allowing a smooth, almost silent rolling action. A low threshold guide channel is available for internal applications - no obtrusive door sill, just a recessed track in the floor.

Carriers, Guides and Pivots

Carriers, guides and pivots use the highest grade stainless steel rollers and bearings. Floor guides and floor pivots are offset so the floor guide channel is located directly under the door panels when they are closed. This system is beneficial from an aesthetic perspective and reduces the opportunity for dust and debris to enter the channel.

Handles, Hinges and Dropbolts

Our doors include heavy-duty pull handles and hinges. Door panels come standard with three hinges, a fourth is added for doors over 7'4". Flush-mounted dropbolts firmly anchor the door panels when closed.

Screening

A fully integrated retractable insect screen is available for openings up to 24 feet wide and 9 feet high. The load balanced system opens and closes effortlessly and remains firmly in any chosen position until further pressure is applied.

The screen is manufactured entirely in stainless steel, brass and reinforced engineering polymers. The tough PVC-coated polyester mesh used in the screen is hard wearing, resistant to damage, easy to clean and can be replaced if necessary.

Our Fold-A-Way Patio Doors are manufactured with Centor Architectural's hardware and screening systems. For detailed information, visit Centor's website at: www.centorarchitectural.com.

Options

- Handle sets in twelve solid finishes and two split finishes.
