

Glider Window

NEW AND IMPROVED

Lincoln's new and improved Glider is now available!

Aluminum clad units now feature extruded frames and sash, making them a horizontal compliment to our popular Double Hung line.

New durable solid brass rollers reduce friction and improve functionality and new low profile sash locks, available in additional finishes, are made to last and stay out of sight.

Now manufactured with cope joints instead of mitered joints, the windows have a more aesthetically pleasing look and will match the rest of our window lines.

Features/Benefits and Options

- Available as a single slider with one operating sash or triple slider with operable flankers.
- Two removable screen options include a full-screen or a half-screen.
- Durable solid brass rollers reduce friction and improve functionality.
- Low profile pick-resistant lock available in seven finishes including: White, Bronze, Satin Nickel, Polished Brass, Oil-Rubbed Brass, Faux Bronze and Coppertone. Units with 32" glass or taller have two locks.
- Six options of interior wood species can be ordered including: Pine (standard), Mahogany, Fir, Oak, Cherry and Alder.
- Four frame and sash exteriors available including: Extruded Aluminum Clad in eight Standard, nine Feature and unlimited Custom Colors; Primed Wood; W-V Vinyl Clad in three colors and Hybrid.
- Multiple glass options include Clear Insul, LoE², LoE366, Neat, Preserve and multiple Tints and Obscure Glass choices. For greater energy efficiency, argon is added to all Low-E glass units, at no cost to the customer, with the exception of those units requiring capillary/breather tubes. These units include, but are not limited to, glass 12" and less in width or height and units shipped over high elevations. Lincoln does not guarantee that the initial argon fill rate will be maintained over the life of the product. Argon depletion may decrease energy efficiency. For more information, contact your local distributor or Lincoln Wood Products, Inc.
- Three styles of grids are available including: Simulated Divided Lites in three standard profile widths including: 7/8", 1-1/8" or 2"; Contoured Internal Grilles (grilles between the glass) and Interior Wood Grilles in 5/8", 1" and 1-1/4" single profile and 7/8" double profile, with or without surround.
